Our philosophy

Company about

"EFFILUX designs and manufactures innovative LED lighting for machine vision.

Innovation has been embedded in the DNA of the company since its foundation. The company differentiates itself through its control of LED lighting, its advanced optical expertise, innovative products and quality services. Even today its key differentiators enable EFFILUX to post growth of over 60% per year over the last three years.

EFFILUX offers a range of innovative and quality standard products. The research department, separated into 3 poles (electric - optical - mechanical), proposes to develop customized solutions.

EFFILUX has established trusted relationships with leading distributors of machine vision components in Europe. The company occupies the place of leader in European machine vision.

We look forward to working together,

Arnaud Mestivier & Jean Philippe Blanchot"

We pay particular interest to our team.
The complementary skills and the cohesion spirit are the strength
of EFFILUX and bring your project to success.

From design to delivery, EFFILUX uses all its expertise and knowledge to meet customer's specifications.

Engineering knowledge

- > 35 years of experience in optical design.
- > Experience in industrial integration.
- > LED expertise.

Outsourcing Network

- > Proven mechanical subcontractors.
- > Electronic partners for design and high volume manufacture.
- > Partnerships with leading optical manufacturers.

Reactivity and flexibility

- > A reactive team to meet your goals.
- > Delivery of the most standard products within a week.

All lighting system is tested and validated to deliver to the customer a reliable and robust product.

EFFILUX offers efficient and technologically advanced lightings.

*We provide quality products
to meet your requirements.
For us quality is a key point !*

Services definition of need

For each machine vision project, a lighting solution must be tested and validated. EFFILUX reviews your application for free, provides you advice and technical support to finally deliver you either a standard product of its range, a custom development (see page 7).

Your specifications ? (see Annex page 80)

Optical ?

Mechanical ?

Electronical ?

Environment ?

Free feasibility

EFFILUX helps its customers to determine the best lighting solution within the constraints of the project.

Loans of standard products

EFFILUX provides loan units to be shipped at customer's in order to accelerate tests and feasibilities.

Demo package

EFFILUX offers the opportunity for its partners to acquire demo package cases at discounted prices.

Services custom development

EFFILUX designs, prototypes and manufactures tailored lighting systems for machine vision companies.

After an industrialization step, EFFILUX is able to deliver to its customers opto-electro-mechanical LED systems that meet their technical specifications and economical requirements.

> Specifications

Optical : wavelength, intensity / illuminance, power... ?

Mechanical: dimensions, thermal... ?

Electronical : power supply, connectivity, auto-strobe... ?

> Mechanical design

> Optical design

> Electronic design and thermal study

Services custom development

> Optical set up

Optical laboratory to test and quickly validate the feasibility of the project.

> Prototyping

> OEM development

If project is duplicated, EFFILUX performs an industrialization study following the specified quantities and cost targets of its customers.

Services custom development

> Why choosing and trusting EFFILUX ?

The custom development represents 50%.

Added values

- Project management from specifications to mass delivery
- Optical, mechanical and electronical research department
- Mastery of LED technology
- Optical expertise
- Industrialization expertise
- Proven experience in sensors and machine vision
- Quality
- Reactivity

Services custom development

LED bar

EFFI-Flex adjustable beam angle LED bar

Auto-strobe version
available

- Description

EFFI-Flex is a product that suits your needs with **different lens adjustment positions**. It is an adjustable product in term of wavelength, a compact and easy to install product.

The EFFI-Flex led bars are fitted with **high power LED**. Through its diffusers (transparent, semi-diffuse and opaline) and polarizers, EFFI-Flex provides a **directional, darkfield or diffuse lighting** adapted to many machine vision applications.

- Applications

- *Automatic identification applications*
- *Quality control*
- ...

EFFI-Flex adjustable beam angle LED bar

- Optical configurations

> Length depending on number of LED

WW : number of LED	1	3	5	10	15	...
Standard version	55 mm	95 mm	135 mm	235 mm	335 mm	More than 4 m
1 LED / 2 positions version	-	-	235 mm	435 mm	635 mm	More than 4 m

Part number : EFFI-FLEX-WW...

If 1 LED / 2 version, add -L2 (Length X 2) after the number of LED

> Available wavelengths

Color	● UV 365*	● UV	● Blue	● Green	● Red	● IR	○ White (T* = 5500 K ± 500 K)
XXX : wavelength (nm)	365	405	465	525	625	850	000

* If UV 365: no lens (not supported) and glass window

Part number : EFFI-FLEX-WW-XXX...

if RGB : -RGB

Other wavelengths are available on request : 385nm, 660 nm, 740 nm, 940 nm...

> Windows

TR : Transparent

SD : Semi-diffuse

OP : Opaline

EFFILUX offers different types of interchangeable windows to find a good compromise between power and homogeneity depending on the nature of the object to control.

+ Powerful ← → + Homogeneous

Part number : EFFI-FLEX-WW-XXX-YY...

YY : TR, SD ou OP

If not specified, default semi-diffuse window

> Emission angle according to the lens position

EFFI-Flex offers 4 lens configurations, manually adjustable to change the angle of emission.

Position	P0*	P1	P2	P3
Angle	<p>* Without lens</p>			

Part number : EFFI-FLEX-WW-XXX-YY-ZZ

ZZ : P0, P1, P2 ou P3

If not specified, default P2 position

EFFI-Flex adjustable beam angle LED bar

> EFFI-Flex-Linescan

Thanks to its optical accessory **Flex-Linescan**, the led bar EFFI-Flex is transformed into a linear lighting or a darkfield lighting : EFFI-Flex-Linescan.

Configuration

Without linescan

With linescan

Part number : EFFI-FLEX-WW-XXX-TR-P3-LS

LS : flex-linescan accessory

If flex-linescan, add -LS in the part number

Possibility to buy only the accessory

> Polarizer

The optical accessory **Polarizer** eliminates glare caused by the lighting on parts to control. The camera can then analyze the part, without being disturbed by the glow effects.

Without polarizer

With polarizer

Part number : EFFI-FLEX-WW-XXX-YY-ZZ-POL

POL : polarizer accessory

If polarizer, add -POL in the part number

Possibility to buy only the accessory

> Custom

On request

Cylindrical lens

EFFI-Flex adjustable beam angle LED bar

- Mechanical configurations

> Standard EFFI-Flex

Version	1 LED	3 LED	5 LED	10 LED	15 LED	20 LED	25 LED	30 LED	...
L : 1 LED / 1 position (mm)	55	95	135	235	335	435	535	635	More than 4 m
L : 1 LED / 2 positions (mm)	-	-	235	435	635	835	1035	1235	More than 4 m

> EFFI-Flex IP67 (waterproof)

Advantages

- IP67
- Smooth walls to avoid dust accumulation
- Water cooling
- Passive cooling (with heatsink)

Version	1 LED	3 LED	5 LED	10 LED	15 LED	20 LED	25 LED	30 LED	...
L : 1 LED / 1 position (mm)	55	95	135	235	335	435	535	635	More than 4 m
L : 1 LED / 2 positions (mm)	-	-	235	435	635	835	1035	1235	More than 4 m

i The optical and electrical characteristics are the same as those of the standard EFFI-Flex.

The part number is build in the same way by adding -IP67 between EFFI-FLEX and the wavelength (example : EFFI-FLEX-IP67-625...)

Only the mechanical characteristics change.

1000	0-1000 mA	From a duty cycle > 30%, contact us.			

Part number : EFFI-FLEX-[...]-ELS-XXX-24V

XXX : output current (100%)

* [...] : see optical configurations page 13

EFFI-Smart double row LED bar

Auto-strobe version
available

- Description

EFFI-Smart is a double row high power LED bar available in **many wavelengths** and in **3 configurations** (2 rows of 3, 12 or 36 LED). This is **the most powerful solution** of EFFILUX (2 times more powerful than the previous LED bar EFFI-Flex).

Providing **IP65 sealing**, the product is **customizable** by the customer. He can open it to change the position of the lens (4 positions) and the window (transparent, semi-diffuse and opaline). Therefore, the client controls both the emission angle and the homogeneity/power.

EFFI-Smart is somehow the assembly of tricks and technologies of EFFILUX in one product :

- Robust
- Waterproof IP65
- Flexible
- Chainable : double I/O connectors.

- Applications

- Automatic identification applications
- Quality control
- ...

EFFI-Smart double row LED bar

- Optical configurations

> Length depending on number of LED

WW : number of LED	6	12	36
Configuration	 2 rows of 3 LED	 2 rows of 6 LED	 2 rows of 18 LED

Part number : EFFI-SMART-WW...

> Available wavelengths

Color	 Blue	 Green	 Red	 IR	 White (T* = 5500 K ± 500 K)
XXX : wavelength (nm)	465	525	625	850	000

Part number : EFFI-SMART-WW-XXX...

Other wavelengths are available on request.

> Windows

EFFILUX offers different types of interchangeable windows to find a good compromise between power and homogeneity depending on the nature of the object to control.

TR : Transparent

SD : Semi-diffuse

OP : Opaline

Référence : EFFI-SMART-WW-XXX-YY...

YY : TR, SD ou OP

If not specified, default semi-diffuse window

> Emission angle according to the position of the lens

EFFI-Smart offers 4 lens configurations, manually adjustable to change the emission angle.

ZZ : position	P0	P1	P2	P3
Angle	90° : without lens	45°	25°	10°

Part number : EFFI-SMART-WW-XXX-YY-ZZ

ZZ : P0, P1, P2 ou P3

If not specified, default P1 position

EFFI-Smart double row LED bar

> Polarizer

The optical accessory **Polarizer** eliminates glare caused by the lighting on parts to control. The camera can then analyze the part, without being disturbed by the glow effects.

Without polarizer

With polarizer

Part number : EFFI-SMART-WW-XXX-YY-ZZ-POL

POL : polarizer accessory

If polarizer, add -POL in the part number

Possibility to buy only the accessory

> Smart-Linescan

The optical accessory Smart-Linescan helps to focus and homogenize the light beam in one direction.

Without linescan

With linescan

EFFI-LBRX small LED bar

- Description

EFFI-LBRX * is a very compact, small sized, easy to integrate lighting in applications where mechanical constraints quickly become annoying.

These systems can be mounted with different angles of inclination to illuminate different areas.

* Available for France, Germany and Switzerland

- Applications

- General illumination
- Label inspection
- Character inspection
- Code recognition

- Part number

> 3 rows of LED

Ring

EFFI-Ring adjustable beam power ring

Auto-strobe version
available

- Description

EFFI-Ring meets the major needs of industry by enabling the user to adjust the lighting beam angle.

To focus more or less the light beam (P0 : 90°, P1 : 45°, P2 : 25° and P3 : 10°), simply remove the product and change the position of the lens.

- Applications

- *Quality control*
- *Pick and Place.*

EFFI-Ring adjustable beam power ring

- Optical configurations

> Available wavelengths

Color	 UV	 Blue	 Green	 Red	 IR	 White (T* = 5500 K ± 500 K)

i A pulse controller can be used to power EFFI-Ring with the M8 connector.

EFFI-DFR diffused ring lighting

- Description

EFFI-DFR3 * is a **diffused LED ring lighting** with high luminous surface. The **conical illumination surface** makes it possible to illuminate a work piece from almost any angle.

This product is **easy to integrate** with its reduced dimensions and its simple and practical attachment possibilities.

* Available for France, Germany and Switzerland

- Applications

- Printed characters reading
- PCB inspection
- Caps control
- OCR inspection

- Part number

EFFI-DL diffused square lighting

- Description

EFFI-DL* is a **diffused LED lighting** having a **lateral illumination**. Indeed, the light comes from the sides of the lighting for a **flux emitted conically** towards the workpiece. This system allows both a **darkfield** and **diffused light** for different types of inspections.

This lighting is used close to the surface to be inspected, at **very small distances** of the samples.

* Available for France, Germany and Switzerland

EFFI-DLR diffused angular lighting

- Description

EFFI-DLR2 * is a diffused LED ring lighting that eliminates reflections on shiny surfaces. It is used very close to the workpieces. Its dimensions make it a very compact and easy to integrate system.

* Available for France, Germany and Switzerland

- Applications

- Characters recognition on shiny surfaces
- Presence/absence detection
- Defects control

- Part number

EFFI-HPD uniform ring lighting

- Description

EFFI-HPD * is a powerful and diffused LED lighting. This ring can be used at different working distances thanks to its high power. It is a very compact, easy to integrate product.

* Available for France, Germany and Switzerland

- Applications

- Shiny surfaces control
- Food packaging control
- Plastic films control

EFFI-LSW ring lighting

- Description

EFFI-LSW * is a ring lighting having two to five LED rows oriented with an angle ranging from 0° to 45°. It is a compact and easy to integrate product in different types of machines (robots, production lines, special machines, conveyors, etc.).

* Available for France, Germany and Switzerland

- Applications

- Labels inspection
- Flat surfaces inspection
- Inspection of different types of parts (steel, cast iron, plastic, wood...)

- Part number

Backlight

EFFI-BL backlight

- Description

EFFI-BL is a **large, powerful and homogeneous** LED backlight. The high luminance and the homogeneity greater than 90% make it the ideal product for inspection by backlight camera.

The backlight sources are placed behind the part to **highlight their figure into "shadow"**. These lightings offer a **very homogeneous, uniform and diffuse light**, avoiding the reflections generated by the incidence of light rays on parts to control.

- Applications

- *Highlighting the silhouette of the object (maximum contrast between the background and the form)*
- *Dimensional control and absence / presence of holes*
- *Transparent and translucent materials control (glass, fabric, printed circuit...)*
- *Liquid level control in a bottle*
- ...

EFFI-BL backlight

- Optical configurations

> Dimensions

XXX : optical length (mm)

YYY : optical width (mm)

EFFILUX offers all possible dimensions for XXX and YYY every 50 mm up to 1,5 m.

Part number : EFFI-BL-XXX-YYY...

> Available wavelengths

Color	Blue*	Green*	Red	IR	○ White (T* = 5500 K ± 500 K)
ZZZ : wavelength (nm)	465	525	625	850	000

* Optional

Part number : EFFI-BL-XXX-YYY-ZZZ

- Mechanical configurations

> EFFI-BL

> Thin edges EFFI-BL

ⓘ Thin edges : add 'T' after the dimension which must be reduced.
Contact EFFILUX for any CAD request.

Example 1 : EFFI-BL-100-200T

Example 2 : EFFI-BL-100T-200

EFFI-BL backlight

- Electronical configurations

> Connectivity

EFFI-BL is connected to the power supply by a M12 4-pin connector.

Pin number	Cable color	Designation
1	brown	+24V
2	white	n.a.
3	blue	GND
4	black	DIM - max 24V

EFFI-BL - Power (W)

The power of an EFFI-BL lighting is proportional to its surface and equals 7W for 100mm².

Indeed, an EFFI-BL 100x100 consumes about 7W, an EFFI-BL 100x200 about 14W, an EFFI-BL 200x200 about 28W, etc.

Type and number of connectors depending on the power. 1 M12 connector up to 85W.

From 85W, several M12 connectors are required. It is also possible to replace the M12 by M12 PWR. 1 M12 PWR connector from 85W up to 260W.

> Dimming control

EFFI-BL is powered by a 24V DC source.

By using the DIM pin, the luminous intensity may be increased in a linear way :

- 0V - OFF
- 24V - Full ON

> Power version

- 3 times more powerful
- Compulsory use with a duty cycle < 30% !
- Power = power EFFI-BL X 3

Configuration : 150 mA, strobe mode, only white (000).

i The standard configuration is 50 mA.
Other configurations are available on request.
If power version, add -S150 at the end of the part number

EFFI-Flex-BL backlight in LED bar version

- Description

EFFI-Flex-BL is commonly used in **backlight mode** to display the **outline of the parts** to be inspected. However, it can also serve as **very diffuse directional lighting**.

This is primarily a lighting for **linear camera**, allowing **control of paper, glass, transparent material...** It is an adjustable product in terms of wavelength (blue to IR), a compact and easy to install product.

- Applications

- *Highlighting the silhouette of the object (maximum contrast between the background and the form)*
- *Dimensional control and absence / presence of holes*
- *Transparent and translucent materials control (glass, fabric, printed circuit...)*
- ...

EFFI-Flex-BL backlight in LED bar version

- Optical configurations

> Dimensions

YYY : optical length (mm)

EFFILUX offers all possible dimensions for YYY every 100 mm up to 4 m.

Part number : EFFI-FLEX-BL-YYY...

> Available wavelengths

Color	Blue	Green	Red	IR	White (T* = 5500 K ± 500 K)
ZZZ : wavelength (nm)	465	525	625	850	000

Part number : EFFI-FLEX-BL-YYY-ZZZ

- Mechanical configurations

 Contact EFFILUX for any CAD request.

- Electronical configurations

> Connectivity

EFFI-Flex-BL is connected to the power supply by a M12 4-pin connector.

Pin number	Cable color	Designation
1	brown	+24V ± 5%
2	white	n.a.
3	blue	GND
4	black	DIM - max 24V

> Dimming control

EFFI-Flex-BL is powered by a 24V DC source.

Using the DIM pin, the luminous intensity may be increased linearly :

- 0V - OFF
- 24V - Full ON

EFFI-BHD small backlight

- Description

EFFI-BHD / BHDS* is a LED backlight designed for the small objects inspection (screws, nuts, pins...). This lighting system is **homogeneous at 85%** and **easy to integrate** thanks to its thinness and its attachment to the side.

* Available for France, Germany and Switzerland

- Applications

• Quality control with backlight

- Part number

> BHDS

Dome and flat dome

EFFI-FD flat dome

- Description

EFFI-FD is a diffused LED lighting flat dome for reflective surfaces. It is ideal for machine vision applications where light is both direct and diffused.

EFFI-FD offers the advantage of being **easy to integrate** on a production line. It is even often used as the main mechanical basic vision application. EFFI-FD can in some cases replace IDS dome lighting (see page 44) .

- Applications

- *Characters detection on a reflective packaging (metal for example)*
- *Bar code reading on the curved bottom of a box*
- *Objects control whose surface is irregular*
- ...

EFFI-FD flat dome

- Optical configurations

> Dimensions

XXX : optical length (mm)

Configuration : 150 mA, strobe mode, only white (000).

i The standard configuration is 50 mA.
Other configurations are available on request.
If power version, add -S150 at the end of the part number

EFFI-IDS indirect dome lighting

- Description

EFFI-IDS4 * is a **dome lighting**. This system will be ideal for chip, stains on circular or cylindrical objects, solder inspection and substrate inspection.

With its **multidirectional and indirect light**, it deletes the light reflections or shadows that can be seen on the reflective parts.

* Available for France, Germany and Switzerland

- Applications

- Metal parts inspection
- Flat surfaces inspection
- Reflective parts inspection

- Part number

EFFI-IDT indirect tunnel lighting

- Description

EFFI-IDT2 / IDT3 * is a **tunnel-shaped dome lighting**. Its advantage over traditional dome is the fact of presenting an open cylindrical shape on each side.

This lighting system is ideal to overcome the gray areas and bright spots on reflective cylindrical parts.

* Available for France, Germany and Switzerland

- Applications

- Metal parts inspection
- Flat surfaces inspection
- Reflective parts inspection

- Part number

Linescan

EFFI-Line high power linear lighting

- Description

EFFI-Line is a linear LED lighting designed for short linear inspection applications.

The luminance of the diffuser is perfectly **homogeneous** and **extremely powerful**. This quality of light makes it the ideal product for **linear inspection applications** on reflective or transparent surfaces.

- Applications

- Large areas control (paper strips in printing for example)
- Control of parts moving at high speed
- Highlighting of elements on one line or a specific plan
- Quality control
- Linear inspection of transparent products (cigarette paper, plastic films...)
- Linear inspection of reflective products (glass plates, conformal coatings, solar panels...)
- ...

Projector

EFFI-Sharp powerful and homogeneous projector

- Description

EFFI-Sharp is a LED projector producing **very powerful and focused beams**. It projects shapes such as **discs or squares** (or custom shape) to illuminate objects at **short or long distance** from 20 mm to 2 m.

The **FocusLight** version allows to focus the beam for a **short working distance**, providing a **very intense lighting**.

The **Power** version emits a **light beam 2.5 times more powerful** than EFFI-Sharp. The EFFI-Sharp Power features allow it to illuminate objects at **large working distance**.

The **Focuslight Power** includes EFFI-Sharp Focuslight and EFFI-Sharp Power features.

- Applications

- *Quality control*
- *Surface defects detection*
- *Contour defects detection*
- *Color identification*
- ...

⚠ In expert mode, the LED is wired directly to the M8 : no protection for the LED !

EFFI-Sharp V2 High power projector of patterns

Available from July 2016.
Thank you to contact us to get all information you need.

Auto-strobe version
available

- Description

EFFI-Sharp V2 is the new projector with high power LED EFFILUX. It projects **discs** or **squares** (or custom shapes) to illuminate **short or long distance** objects from 20 mm to 2 m.

Compared to its predecessor EFFI-Sharp, it offers **power up to 15 times higher** and a simplified lens adjustment system.

There are 3 versions of **EFFI-Sharp V2** offering for each different optical, mechanical and electronic characteristics depending on customer needs.

- **Compact** version (standard) : EFFI-Sharp V2 Compact
- Version with **passive cooling** : EFFI-Sharp V2 Passive
- Version with **fan** : EFFI-Sharp V2 Fan.

- Applications

- *Quality Control*
- *Surface defects detection*
- *Edge detection*
- *Color identification*
- ...

EFFI-HBF LED spot

- Description

EFFI-HBF * is a LED lighting that replaces halogen light sources. It is designed for a range of applications : alignment, macro inspection, spot lighting... Its advantages are its small size, long lifetime and low power consumption.

* Available for France, Germany and Switzerland

- Part number

EFFI-HBF-00-08-1-X-5V

EFFI-HBF-00-16-1-X-5V

EFFI-HBFS-00-08-1-X-5V

Part number	Color (X)	Voltage / Power	Current

3D projector

EFFI-Lase structured LED lighting

- Description

EFFI-Lase is a **structured LED lighting**. It projects **powerful and accurate patterns** such as : line, cross, cloud of dots... Designed for **3D reconstruction, stereovision and alignment** applications, EFFI-Lase has the **same quality as a laser beam** (precise, powerful, homogeneous) and **removing any speckle problem**.

EFFI-Lase Power is a structured LED lighting using standard EFFI-Lase features but emitting a light beam amount 2.5 times more powerful.

Advantages VS laser :

- *NO SPECKLE : more accurate*
- *Eye safety*
- *Compatible C-mount objective*
- *Several standard masks*
- *Homogeneity > 80 %*

- Applications

- *3D profilometry*
- *Stereovision*
- *Alignement*

3D projector EFFILUX (on top) VS Laser (below) : no speckle so more accurate

EFFI-Lase V2 structured lighting with interchangeable masks

Auto-strobe version
available

- Description

EFFI-Lase V2 is the new structured LED lighting. It is designed for **3D reconstruction, stereovision and alignment applications**. It projects **powerful and finesse motives** such as : **line, cross, cloud of dots...** Compared to its predecessor EFFI-Lase, it is **6 to 15 times more powerful *** and it allows to **direct and to interchange masks** easily.

There are **3 versions** of EFFI-Lase V2 offering for each different optical, mechanical and electronic characteristics depending on customer needs.

- **Compact** version (standard) : EFFI-Lase V2 Compact
- Version **with passive cooling** : EFFI-Lase V2 Passive
- Version **with fan** : EFFI-Sharp V2 Fan.

** Depending on the chosen LED card*

Advantages VS laser :

- **NO SPECKLE** : more accurate
- **Eye safety**
- **Compatible C-mount objective**
- **Several standard masks**
- **Homogeneity > 80 %**

- Applications

- **3D profilometry**

Telecentric

- Description

At the output of a telecentric lighting, the light is **collimated**. The collimated light is a **parallel structure of light rays** from a point source. The illuminated area and light intensity remain the same whatever the distance.

EFFI-Telecentric is a **telecentric LED lighting** (parallel light at the output) for the **measurement** and **edges detection** of objects with great accuracy. It is used either by **backlighting** or associated with a **coaxial system**.

- Applications

- *Highlighting of reliefs (dings, dents, scratches ...) on flat and reflective surfaces*
- *Edges detection of objects whatever its opacity (no phenomenon of refraction)*
-

Collimated light :
the light rays are parallel

- Flex-Linescan

Thanks to its optical accessory Flex-Linescan, the led bar EFFI-Flex is transformed into a linear or a darkfield lighting : EFFI-Flex-Linescan.

Configuration

Without Flex-Linescan

With Flex-Linescan

	Flex-Linescan accessory integrated in EFFI-Flex	Flex-Linescan accessory alone
Part number	EFFI-FLEX-WW-XXX-TR-P3-LS*	EFFO-FLEX-LS-WW*

* WW : number of LED

XXX : wavelength (nm)

TR : transparent window

P3 : P3 lens position

"-LS" means that the Flex-Linescan accessory is mounted in the product.

Accessories electronical accessories

- Pulse controller

EFFILUX pulse controllers are designed for high throughput vision applications. They can control the power light to create bright flashes of high intensity that will be synchronized with the camera.

The principle is to feed the high power LED lighting for very short times so as to provide a large amount of light for the acquisition time.

It can control multiple lightings with a single controller (up to 4 channels). The output current can reach up to 1A @ 30V in continuous and 10A @ 200V in strobe mode. In addition, Ethernet and RS232 connectors are available across the range.

Pulse controller	Characteristics
EFFI-IPSC4	4 channels, Ethernet RS232, max. current per channel 10A@200V in pulse mode and 1A@30V in continuous, LxWxH 130x142x56 mm. Response time : 2 µs , minimal pulse length : 2 µs at 10A.

> EFFI-IPSC4 cables

Connectivity	Orientation	Length	Part number	Compatibility
M8 - Female Male - 3 pins	Straight Straight	2 m	EFFC-CAB-M8-SUBD-FM-3-DD-L2	EFFI-Sharp, EFFI-Lase
		5 m	EFFC-CAB-M8-SUBD-FM-3-DD-L5	EFFI-Sharp, EFFI-Lase
		10 m	EFFC-CAB-M8-SUBD-FM-3-DD-L10	EFFI-Sharp, EFFI-Lase
M8 - Female Male - 4 pins	Straight Straight	2 m	EFFC-CAB-M8-SUBD-FM-4-DD-L2	EFFI-Sharp V2, EFFI-Lase V2, EFFI-Ring
		5 m	EFFC-CAB-M8-SUBD-FM-4-DD-L5	EFFI-Sharp V2, EFFI-Lase V2, EFFI-Ring

		10 m	EFFC-CAB-SUBD-M-5-D-L10	Custom

- Potentiometer

EFFI-Dimmer is the dimmer proposed by EFFILUX. It adjusts the light intensity (via control of DIM) of the following products : EFFI-Flex "ELS" version, EFFI-Flex-BL, EFFI-BL, EFFI-FD, EFFI-Lase, EFFI-Sharp, EFFI-Telecentric, EFFI-Smart, EFFI-Lase V2...

Input : a M12 connector plugged to a 24V DC power supply

Output : choice between the two M12 connectors (depending on the DIM voltage range: 0-5V or 0V-24V) allowing to manage all EFFILUX products.

Potentiometer	Characteristics
EFFI-DIMMER	Electrical power < 96W / 24V@4A)
EFFI-DIMMER-PWR	Electrical power < 288W / 24V@12A)

Accessories electronical accessories

- Power supplies

EFFILUX offers power supplies compatible with all lighting systems. These boxes can power and control the light intensity of the products by varying the voltage (up to three lightings).

- Cameras fixings

EFFILUX offers camera mounting brackets for combining EFFI-FD light or EFFI-Ring with a camera.

Compatible camera models :

- Basler : Ace Series, Pilot Series, Scout Series
- Cognex : Insight 5000 Series, Insight 7000 Series, Insight Micro
- Datalogic : A30 Series, T4x Series, M1xx Series, M2xx Series, M3xx Series
- IDS : UI-5220 CP, UI-1120 SE, UI-1220 RE, UI-3220 CP, UI-5120 SE, UI-5120 RE
- Matrox : Gator EYE, Iris GT

- Lightings fixings

Fixing	Part number	Characteristics	Compatibility
T-Nut 	EFFV-BOLT-0011	T-Nut to insert in the product slot. Delivered with a screw M6x14.	EFFI-BL, EFFI-FD, EFFI-Flex
Bracket 	Without groove : EFFM-1-0017 1 groove : EFFM-1-0019 2 grooves : EFFM-1-0021	This fixing is fixed in the product profile with a T-Nut and the desired mechanical support via a second T-Nut. Delivered with two screws M6x14, two T-Nuts EFFV-BOLT-0011 and two washers.	EFFI-BL, EFFI-FD, EFFI-Flex
"Elcom" ball 	Drilled : EFFM-1-0009 NOT drilled : EFFM-1-0002	Drilled : this ball can be attached to products using the two M4 holes. Supplied with two screws M4x12, a screw M6x14 and a T-Nut EFFV-BOLT-0011. NOT drilled : this attachment can also be used to attach the following products by screwing into the section through the central hole. Delivered with a T-Nut EFFV-Bolt-0011 and two screws M6x14.	Drilled : EFFI-Sharp (on EFFI-Sharp Power, the ball joint is fixed on the rear of the heatsink), EFFI-Lase, EFFI-Telecentric NOT drilled : EFFI-BL, EFFI-FD, EFFI-Flex
Clamping flange on the body 	EFFM-1-0001 (anciennement EFFI-Clamp)	The clamp grips the round body of EFFI-Sharp. 2 fastener configurations are possible. Delivered with two screws M4x20.	EFFI-Sharp, EFFI-Lase, EFFI-Telecentric
Fixation for dome 	EFFI-IDS3-00-XX-BRACKET		EFFI-IDS

UWAVE
INNOVATIVE LED UV SYSTEMS

Expert in the UV LED light sources for adhesives, resins, varnishes and inks drying applications.

- Presentation

UWAVE designs and sells high power UV LED sources for adhesive, resins, varnishes and inks curing applications in industrial environments.

UWAVE consolidates the presence of EFFILUX in the worldwide industry with its expertise in the integration of high power UV LED lighting systems. As an EFFILUX's spin-off, it adapts existing skills in Engineering (optics, mechanics, etc.) for the **polymerization** or simply **UV drying** market.

UWAVE offers different **efficient standard product ranges** to meet different market applications. In parallel, it designs, prototypes and manufactures UV LED lighting tailored for **OEMs** and **special machinery manufacturers**. Its speed, flexibility and technical expertise make UWAVE a key partner in the success of your projects using high power UV LED lighting.

- Applications

LED UV drying systems for industrial processes in optics, electronics or areas of photonics.

LED UV drying systems for medical or industrial use bonding and sealing.

UV LED printing for screen printing, offset, flexo and digital.

UV coatings for industrial applications. Coatings for wood and other surfaces.

- Ranges of standard products

UV SPOTS

Portable UV sources or integrated in robots.
UV Spots helpful for manual or automated use.

UV surfaces

Homogeneous UV sources to dry large areas in the fields of optics, electronics, etc.

UV bars

Linear UV bars prevalent in industrial environments for drying inks, varnishes or UV adhesives.

UWAVE will answer your questions in order to set up the UV equipment for your application.

Annex specifications definition

Before contacting us, please consult these technical issues.
They will help you to define your needs.

Optical

- Wavelength ?
- Illumination requirements : how many "Lux" or "mW / cm²" at a defined working distance ?
- Illuminated area ?
- Homogeneity requirement ?
- For structured lightings : depth of field ? Edge sharpness ?

Mechanical

- Dimensions ?
- Min / max working distance ?
- Cooling system ?
- Fixings ?

Electronical

- Connectors ? (M8 - M12, number of pins, conventions...)
- Power supply ?
- Auto-strobe or continuous ? (if auto-strobe, which duty cycle and maximum pulse time ?)

Environment

- Inspected material ? (size, reflective or not, color...)
- Ambient light around the application ?
- Selected camera ?
- Atmosphere ? Temperature, humidity, dust...

All products specifications and data are subject to change without notice to improve reliability, functionality, design or other. Photos and pictures are for illustration purposes only.
